Larry,

Sorry for the delay in responding -- I've been in meetings all day. I just left you a voicemail on this. I'd prefer to speak with you rather than trying to write a detailed response. My home phone number where I can be reached this weekend is Ex. 6 Personal Privacy (PP) Saturday may be easier than Sunday, but I could probably return a call Sunday evening if that's the only time. Monday I'll be in DC, and will probably not have time for a call.

- Walter

Hi Walter -- Thanks again for your time this morning -- it was helpful to us in understanding the alternatives under consideration. We have one follow-up question for now:

Under the scenario you described, in cases where the 1ppm standard is not met after the first pass, would GE (1) be required to be required to do a second pass to try to meet the 1ppm standard, or (2) have the choice (up until they hit the percentage capping limit) of whether to cap or re-dredge? If it's #2, what would be the rationale for giving GE that choice, rather than (for example) requiring at least a second pass before allowing any option of capping? It would seem that #2 guarantees they will definitely do (at least) the maximum allowable amount of capping.

We'd very much appreciate any clarification you can provide on that issue today. Thanks,

-Larry

I have a commitment from 10 - 11 on Friday, Dec. 3 and another at 3:30, but could be on a call at 4:30, if necessary. I can also try to reschedule the 10 a.m. if we cannot have our call at 9, but that would be best for me.

Many thanks,

Manna

Hi Judith and Walter,

Thanks again for the meeting yesterday -- we'll be sending follow-up note to Bob Sussman this afternoon and will copy both of you by email. You suggested yesterday that we do a follow-up call so we could hear more of the details. We appreciate the offer and would definitely like to take you up on it, as soon as you are able. Judith -- it sounded like some time sooner than Friday could be arranged?

I'm copying Rebecca, Manna, and Althea (and my assistant) to help facilitate scheduling. Thanks again.
